The Human Body

+++

Introduction

**My name is Saanvi
Shah and I will be
guiding you today!**

Your turn:

**My name is [...] and my
favorite color is...**

Final Product:

We are going to
be making this
at the end!!

Does anyone know
what body part this
is??

+ + +

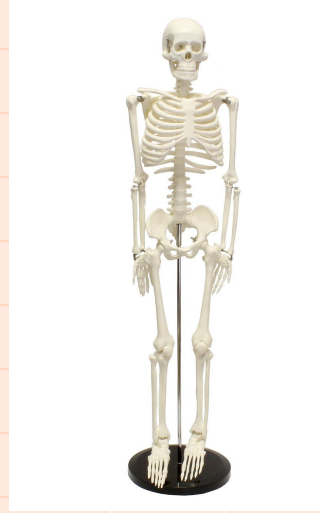

The Skeleton

Our skeleton
gives our body
shape and
helps us move.

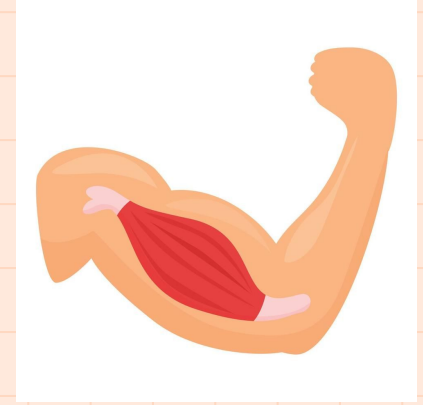

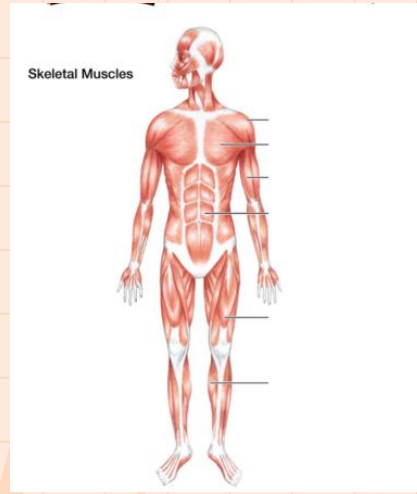

What would happen if
we didn't have bones?
How would we move?

Muscles

Muscles work with
our bones to help us
run, jump, and play.

Can you think of a
time when you used
your muscles to do
something fun?

The Heart And Brain

Our heart pumps blood all around our body. Blood carries oxygen to all our organs.

Our brain helps us think, learn, and control our movements.

Hands and Legs

Our hands help us grip,
touch, and feel things. Our
legs help us walk, run, and
jump.

What everyday things
do you do with your
hands?

Stomach

Our stomach helps us in
storing food and mashes it
up!

Where does your food
go after you eat it!

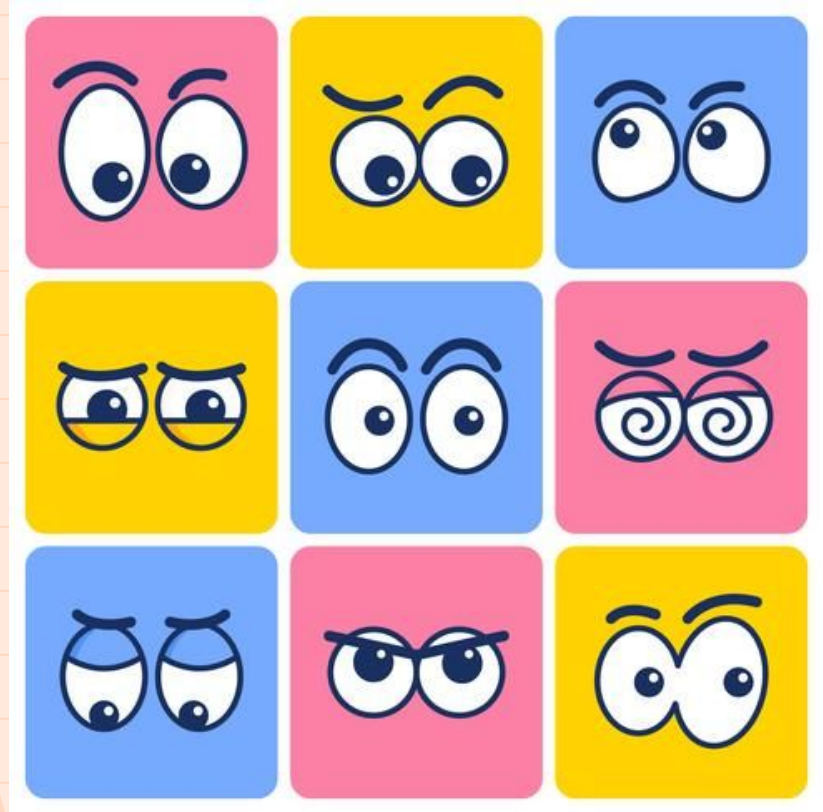

Eyes

Our eyes helps us see
everything around us like:
colors, shapes, and objects!

What can you see
with your eyes?

Game Time

We are going to play Simon
Says to test our knowledge
on body parts!

Video:

<https://www.youtube.com/watch?v=fq6LEGerDFs>

Lets play!

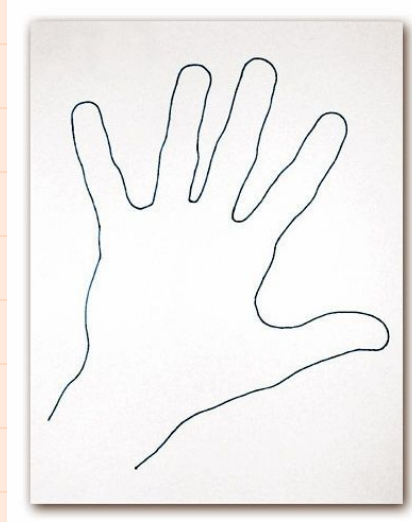

Craft Time

First Step:

Grab a piece of paper and marker!

Second

Trace your hand on piece of paper!

Step:

Third Step:

Cut out hand from piece of paper!

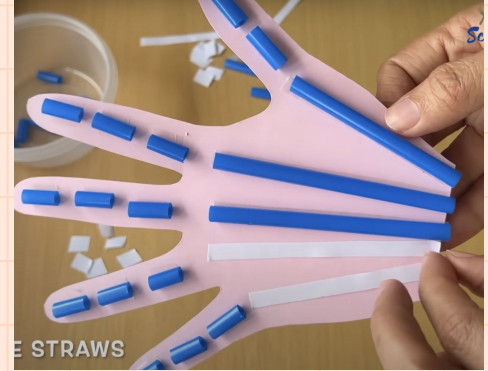

Craft Time

**Fourth
Step:**
Grab three straws!

Fifth Step:
Split them into 2
parts: 1 short and 1
long

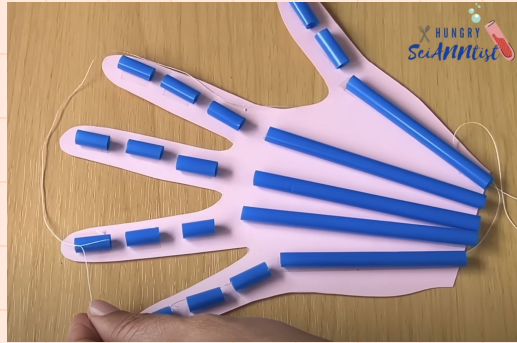

Sixth Step:
Take tape and put
the straws on the
fingers

Craft Time

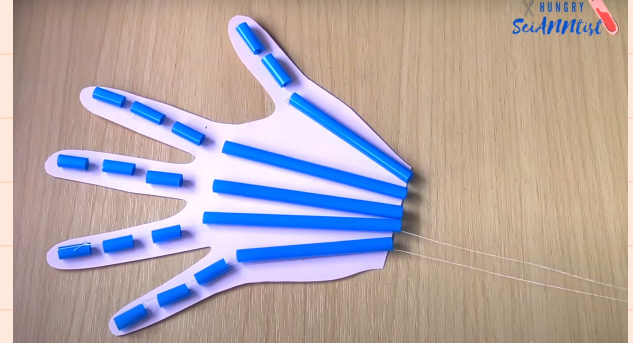

Seventh Step:

Take your string and cut 3 pieces!

Eight Step:

Tie one end on the straw on the fingertip.

Ninth Step:

Put the rest of the strong through the others straws down the fingers
